Breeding Objectives

Our breeding objectives are based on profitability for the commercial farmer.

We use all the science and technology available to us, along with robust stockmanship to breed Terminal and Maternal rams to return our clients maximum profit.

We focus on Meat and Growth traits because at present the biggest financial return is from fast growing and high meat yielding lambs.

Welcome

Chris and I would like to welcome you to our 19th On Farm Auction of 2 tooth rams.

In today's farming environment it is essential that you get maximum financial returns from your sheep farming enterprise. We are confident that all rams on sale have the genetics that will enable you to achieve this.

Over the past 2 years we have extended our DNA testing to include parentage. DNA testing enables us to select sires with more accuracy to make superior genetic gain in both our terminal and maternal flocks. Myomax results are included in this catalogue.

Our auction gives all sheep farmers the opportunity to take advantage of the comprehensive breeding programmes we use at Wharetoa.

Thank you for your ongoing support. We have every confidence that your ram purchases will contribute significantly to your breeding programme.

Chris and I wish you a happy and safe Christmas and New Year and we hope you have the opportunity to relax with your family over the holiday period.

Regards and best wishes,
Garth and Chris Shaw
